

Title: Test of Tika extraction

Author: Gert Schmeltz Pedersen

This is a test document for the Tika extraction of Gsearch 2.4 fcrepo-1010.

Extension for testing fcrepo-1049 Improve the control over writeLimit in getDatastreamFromTika. The test sets writeLimit to a low number and reindexes this object, then search with gfindObjects will reveal that only the first writeLimit characters were used in indexing the datastream.
